Legislation subsequent to the Budget of 1947 made the mandatory printing of the 4¢ - EXCISE / TAX surcharge unnecessary and RP-1779 (the *unsurcharged* imperforate 2/19th pound “Series of 1942”) was introduced. The control number sequence continues without a pause since the controls had been *pre-printed* on the sheets.

Having suffered through the cancellation BAD on tobacco used in November 1948, the management couldn’t stand the thought of using CAD for December, and switched their coding to DAD. I have occasionally seen DCA on tobacco manufactured in December 1948. This version was probably an early code for the month.

The control numbers on the 2/19th pound Type I “Coat-of-Arms” strip have run through the introductory and lettered alphabetic sequences from 0000001 to at least H8739710 - a total of 88,739,710 strips.

The catalogue assigns **RP-1811** to the 2/19th pound Type II “Coat-of-Arms” strip with *hollow denominations*. The vertically rolled *wavy* three-line cancellations are characteristic of “Macdonald Tobacco” and come in different colours - probably designating the year of production. The three sets of three vertical *straight* red lines are cancellations from “Rock City Tobacco”. With the introduction of the Type II “Coat-of-Arms” a new control sequence has begun.

The use of **RP-1841** (the *solid red* denomination Type II “Coat-of-Arms” strip) began late in 1958. The introductory date for tobacco strips was not fixed (as with postage stamps) but will vary with the denomination as the old stock was consumed, and the new design was introduced to production. In some cases the two designs are for a time used concomitantly, and their dates overlap.
